ABSTRACT

The agriculture sector plays a crucial role in our country, but farmers often face challenges in selling their products directly without the involvement of middlemen. To address this issue, we have come up with a great idea that allows farmers to sell their products directly to customers at a fixed price, without any commissions charged by intermediaries. This is an e-commerce website that involves three types of roles: an admin who manages the website, farmers who sell and deliver the products, and users who place orders on the website.
